The Statewide Voter List Maintenance Project is well underway, and the first mailing will be sent to voters on May 17th. One of the enhancements implemented for this project is the availability of a new, web based Image Viewer which will enable you to view returned cards online, as well as make changes to the status of Voter Response Card Exceptions.

Online training sessions will be offered to familiarize counties on the use of this tool and answer any questions that may arise. We understand that it is a busy time and wanted to emphasize that this training is not mandatory, but intended to help you use this new tool most efficiently in the voter list maintenance program. If any of these timeslots are not workable within your schedule, please contact us so that we can provide an alternative timeslot. Training sessions will be approximately 60 minutes and will be offered over a number of days and times beginning April 18th.

Please notify us at your earliest convenience regarding your preferred time slot for training. We are limiting each session to 6 counties, so we would also ask that your provide an alternate time slot in the event your original request is filled. Please print "P" next to your preferred time, and "A" next to one or more alternate times.
